

## The Big Barn Owl

Big beady eyes shine in the sun light

Beautiful long wings flutter in the air

They catch prey for their baby's

Have long, sharp claws

Long, sharp beaks.

Killing prey before landing

They spread out their wings like fingers.

Their wide, white wings help them swoop

Eating crickets.

Soft thick feathers, delicate wings

Fluffy as a baby's breath.

Big heart shaped face glows in the moon light.

Fly away in the night air

Shadow in the shape of the moon.
